

ANTARIA

Good news for manufacturers and users of sunscreens: the European **Standing Committee on Cosmetic Products** have finalised all the steps towards final addition of **Zinc Oxide** to **Annex VI** (the positive list of sun filters) of the **EU Cosmetics Regulation** ((EC) No. 1223/2009), opening the doors to the development of highly effective and safe sun protection products.

ANTARIA and **COMERCIAL QUIMICA MASSÓ** are ready to help you formulating unique sun protection products including **Zinc Oxide**.

ANTARIA has been a key supplier of **Zinc Oxide** as sunscreen for years. Headquartered in Australia, the company understands and meets the needs of the most demanding sun care markets, through the **ZinClear®** range of **innovative, transparent, micronised** and **Ecocert approved Zinc Oxide** based materials:

- ◆ **ZinClear IM™** is the first generation of **transparent Zinc Oxide dispersions**. One of the most popular products in this group is **ZinClear IM®50CCT**, a dispersion in Caprylic/Capric Triglyceride
- ◆ **ZinClear XP™** is a high performance **Zinc Oxide powder** which leaves **no whiteness** in formulations when applied on the skin. The **UVA performance** of **ZinClear XP™** has been optimised to ensure compliance with the toughest **sunscreen regulations** around the world
- ◆ **ZinClear® XP65 CoCo Dispersion** is the first **ZinClear XP™** dispersion. Being the latest addition to the **ZinClear®** product range, it maintains the **Ecocert** compliance, the market leading **transparency** and the **global broad spectrum regulatory compliance** of **ZinClear XP™**.

The **innovation & application laboratory** of **COMERCIAL QUIMICA MASSÓ** has put a strong focus on the development of **sunscreen** products since its creation back in 1998. Today, the company has **hundreds of prototype stable formulations** available with a variety of:

- ◆ **Textures:** from **rich** to extremely **light** products, adapted to the most strict customer requirements
- ◆ **Galenic** forms: from **creams** to **sprayables, emulsions, oils** or **creamy-gels, thick** or **fluid** products... There are proposals that meet all possible requests
- ◆ **SPF:** that's not an issue! The available formulations cover a **broad SPF spectrum**
- ◆ **"Nature":** the proposals include **mineral only** as well as other sunscreen combinations. **Ecocert** compliance formulations are also available
- ◆ **Applications:** from pure **sun care** to **daily care**, the prototype formulations include proposals for body care as well as specific facial products
