# Conveyor Belt Repair Material

Patches

Strips

Sheet with  
Bonding Layer

Repair Fabric

Cover Strip

Filler Rubber

Bonding Layer

Belt Splicing /  
Jointing Kits

Due to entrapment of material from large material size or because of wear caused by the skirt rubber or any other variants, the conveyor belts can have cuts and gouges, which result in sustained wear in a certain area. If this is not immediately repaired, the cut or wear can cause damage to the belt.

TRS-MASSÓ cold bonding repair materials are specially suited to repair Conveyor Belts on-site. The repair system offered is reliable, time-saving and can be carried out by the on-site maintenance team. These Repair Materials are designed for application on almost all grades of Conveyor Belts, except for hot material and food stuffs handling belts.

The Patches and Strips are supplied with a Bonding Layer and in protective plastic films. They come with a special feather edge, enabling the Repair/Patch/Strip to merge with the covers of conveyor belts completely.

Following are the range of Patches, Strips and Repair Materials offered by TRS-MASSÓ.
